a

JOHAN KITTI SÖDERBERG

Hi,

My name is Johan Kitti Söderberg and I'm a Master's student in Computer Science at KTH. I am currently finish the last part of my Master Thesis while working as full-stack web developer at Nordnet Bank.

On my free time I like to make games and other cool stuff. Recently I released the world's first arena fighter in augmented reality for mobile devices. It can be found along with other stuff I'm working on, in my portfolio (johankitti.se).

Even though I'm graduating from KTH this spring, I have about 1 year's experience working as a software developer from my time at Nordnet.

I spend most of my time making projects on my own but given the opportunity, I love working in a team.
